

❖ For the backend

In the terminal/command line

- `cd Django_backend`
- `python -m venv 'envname'`
- `pip install -r requirements.txt`
- `python manage.py migrate`
- `python manage.py runserver`

In this the backend server should be 8080

❖ For the frontend

In the terminal/command line

- `cd React_frontend`
- `npm install`
- `npm run start`

Now in the browser go to `localhost:8085` to access the main page of this web app site.
